PT 160

PRODUCT DESCRIPTION

PT160 is a new-generation portable RFID reader, compact and extremely easy to use, designed for reading animal identification tags. Equipped with a rechargeable battery and a clear OLED display, it offers excellent mobility and simple operation in farms, veterinary clinics, or field identification activities. Compatible with ISO 11784/11785 FDX-B and ID64 standards, the PT160 ensures fast and reliable reading of electronic ear tags and animal microchips.

PRODUCT SPECIFICATIONS

Operating frequency: 134.2 kHz

Reading standards: ISO 11784/11785 FDX-B & ID64

Reading distance: up to 13 cm (depending on the microchip)

Display: OLED

Battery: internal rechargeable battery

Battery life: approximately 3,000 readings per full charge

Charging: USB, 5 V, charging time 4–5 hours

Operation: single-button operation, instant scan mode

Keyboard emulation function: when connected via USB, the microchip number is automatically inserted into a document

Operating temperature: -15 °C to +45 °C

Certifications: CE, RoHS
